Introduction to Information Security Security Awareness – IT Ramallah, Mövenpick Hotel

Course Overview

IT Professionals are faced with overwhelming security requirement and concerns.

Knowledge of information security concepts and fundamentals permits a more effective response against the growing threats from Internet access and presence.

In **this 1-day** course, students will be introduced to information security concepts, basic fundamentals, and common terminologies. Students will receive concentrated knowledge which will reduce the resistance to security controls implementation.

You'll also be introduced to the ISO 27001 standard, the security industry collection best practices.

Target Audience

The course is intended for IT professionals in general or students of IT related subjects.

Course Pre-requisites

Background of IT basic topics or experience working on IT projects in any discipline.
